

**AIRLINES | RAIL**

*Innovative Thermoplastic and Composite Solutions*

# ABOUT US

*At Magee, yesterday's experience leads to tomorrow's competitive advantage for our customers*

## ***Focusing Expertise, Energy & Excellence***

From our earliest days, Magee has drawn on the proven experience of experts in engineering, production, sales and marketing, and customer service to become what has been recognized as a premier provider of quality new components and replacement units serving a variety of industries.

At Magee, yesterday's experience leads to tomorrow's competitive advantage for our customers. For over five decades, customers in the airline, rail and other industries have come to depend on the quality, value, responsiveness and expert service provided by Magee for their refurbishment and replacement needs. The people at Magee continually rely on their experience while building for the future by collaborating with clients to innovate new applications of thermoplastic and composite components.

# AIRLINES

Magee engineers and manufactures the finest thermoplastic and composite products for the airline industry. Our components meet all OEM or customer standards. We have an extensive catalog of FAA-PMA and Owner Operator approved parts for our airline customers along with OEM components for most of the commercial aircraft currently in service.

- Window Assemblies
- Sidewall Retainers
- Literature Pockets
- PSU Spacer Panels
- Lavatory Floor Pans
- Interior Cabin Light Lenses

# magee

In our position as the most reliable and highest quality thermoplastic and composite manufacturer, we have assisted in pioneering and developing many of the thermoplastic materials currently used in the aviation industry today. We remain a key fabricator to both our customers and material suppliers as an engineering partner and testing facility for the new generation of thermoplastics. **Magee** is also a composite panel fabricator with a wealth of experience and a wide range of capabilities.

# GROUND & RAIL

For over 40 years, **Magee** has served the OEM and refurbishment markets in the ground and rail industry with top-quality components and interior products made from thermoplastics and composites. Our experience spans across locomotive cab linings, light rail and people mover systems along with long range passenger rail applications.

# FAA REPAIR STATION

Although **Magee** is most known for its line of factory new components, we are also a full service repair station for interior products. We repair sidewall panels, bin doors, ceiling panels, spacer panels and carpet risers to like new condition. We also offer support to our repairs with OEM or our factory new FAA-PMA parts for sub-component replacement in order to reduce cost.

Our experience has enabled us to identify failure modes and problem areas during the repair process. We often find solutions for the airline customer or OEM in order to increase the life cycle of the part or allow the customer to benefit from the savings.
